

Anticipated Part L 2013: Towards Target Zero

Tuesday, 20th March 2012
12.30 – 14.00

South Gallery 19&20
Ecobuild 2012, ExCel Centre, London E16 1XL

Background

Part L regulations are a key to the Government's target to reduce greenhouse gases by 80% by 2050, and to zero carbon 2016 targets. Following the anticipated consultation of Part L 2013 in Autumn 2011, this session will examine the likely changes to Part L and their impacts; how to meet the new proposed requirements and an examination of the likely strengthening of as-built requirements.

Who should attend?

Developers, housebuilders, RSLs, architects, M&E contractors and client groups who want to be involved in the agenda for low carbon housing.

To book a place at this event, please email Roger:
roger@goodhomes.org.uk

Programme

Chair: Jon Bootland, Good Homes Alliance

- 12.30 **Introduction to the proposed changes to Part L for the 2013 update**
Paul DeCort, DCLG
- 12.45 **Meeting the anticipated technical requirements in Part L 2013**
Ant Wilson, Aecom
- 13.10 **Part L as a 'stepping stone' to the 2016 zero carbon definition**
Paul Chatwin, Capita Symonds.
- 13.35 **"As-built" performance requirements: How to do it and what the benefits and costs are**
Jon Bootland, Good Homes Alliance
