

Poundbury based developer, ZeroC, has been crowned 'Sustainable Developer of the Year', receiving gold at the highly prestigious What House awards, the leading awards within the house building industry.

Northampton

Their development in Northampton delivered highly sustainable homes within both traditional and contemporary architecture, built to an EcoHomes Excellent standard and incorporating Solar Thermal, Solar Photovoltaic, sheep's wool loft insulation and rainwater harvesting.

Dorchester

These delightful homes were built to an EcoHomes Excellent standard. The technologies used include Rain Water Harvesting, Solar Photovoltaic, Solar Thermal, Heat Recovery Ventilation, High Thermal Insulation, sheep's wool loft insulation and low energy lighting.

Poundbury

Zero C's construction is a new sustainable development being built to Code level 4. These homes shall incorporate Biomass district heating, water saving features, high sound and thermal insulation and low energy lighting.
